### OSPREY SOLAR GROUND MOUNT APPROVAL MEMO

---

Date: February 1, 2017

Project: Nunez Residence Ground Mount  
17970 Avenue 16  
Delano, CA 93215

EPS Job Number: 17-NEG001

To: Jonathan Wise  
Nuance Energy Group, Inc.  
501 Cedar St., Suite E  
Santa Cruz, CA 95060

From: Matthew Gilliss  
Engineered Power Solutions, Inc. (EPS)

---

EPS has reviewed the proposed ground mounted solar job for the Nunez Residence Ground Mount (address listed above) in accordance with the requirements given in the approved (stamped and signed) Structural Documentation Packets titled “2x8 Portrait Layout – Generic California Approval – 72 Cell Modules – Heavy Duty” and dated 1/20/17 by EPS and has found the proposed system, (2) Osprey Ground Mount Units, to have design parameters within the bounds listed in said packets. Once installed, “Proof Loading” pull test results for the earth anchor foundation systems shall be submitted to EPS for review and approval.

It is the installer’s responsibility to ensure the units and foundations are constructed in accordance with the Structural Documentation Packet’s requirements for the site specific design parameters. It is also the installer’s responsibility to install and test the earth anchors to the required loads. All non-structural issues including but not limited to waterproofing, corrosion protection, construction means/methods, electrical, and mechanical issues are not the responsibility of EPS and must be addressed by the solar designer, installer, and/or owner before PV installation begins.

Please feel free to contact me with any questions. Thank you.

Sincerely,

Matthew B. Gilliss, P.E., LEED AP
